Installation Guide

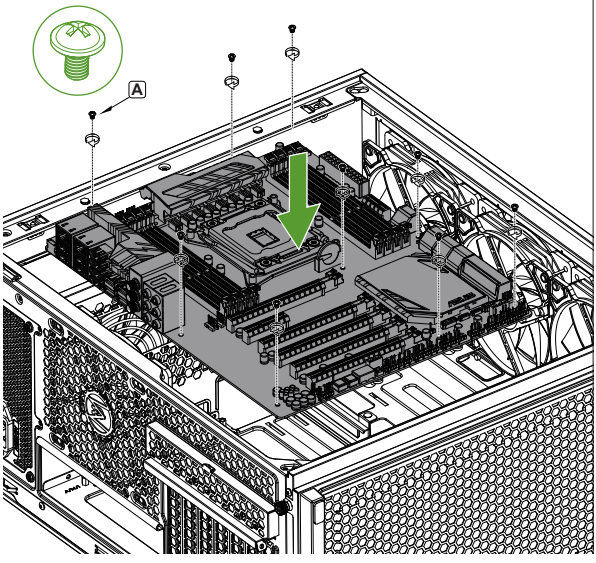

Remove the front panel

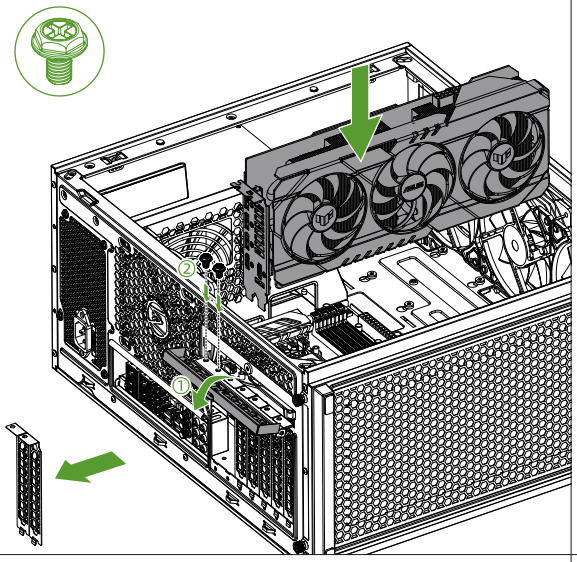

*If the fan has been pre-installed
in front, no need to remove
the panel.

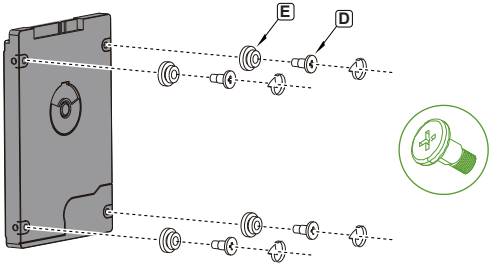

Insert PSU from right side, secure with screws.

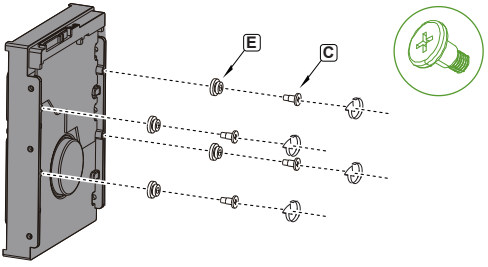

Put in the motherboard, place the I/O baffle, and lock the screws.

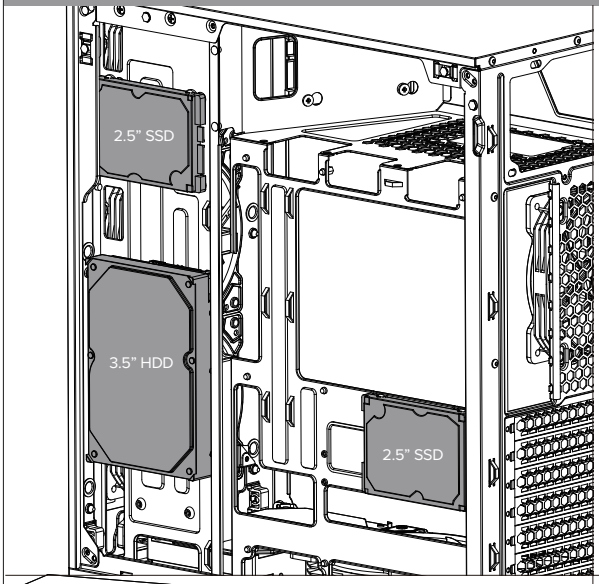

1.Open the magnetic PCI-E baffle.
2.Remove the PCI-E interface card, put it in the graphics card, lock the screw fixation.

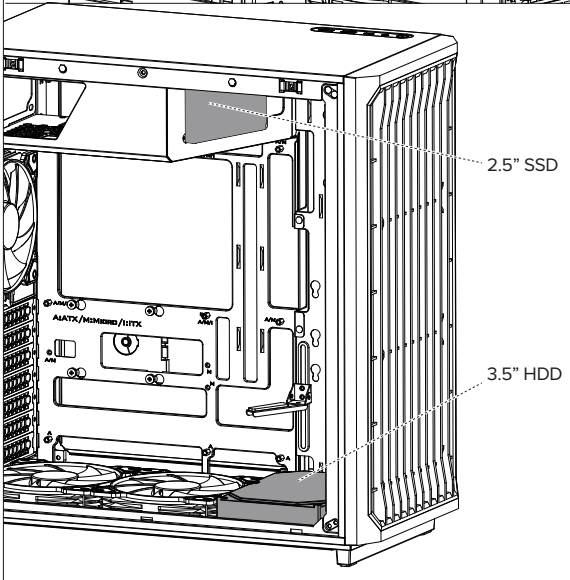

Install SSD and HDD lock -free screws.

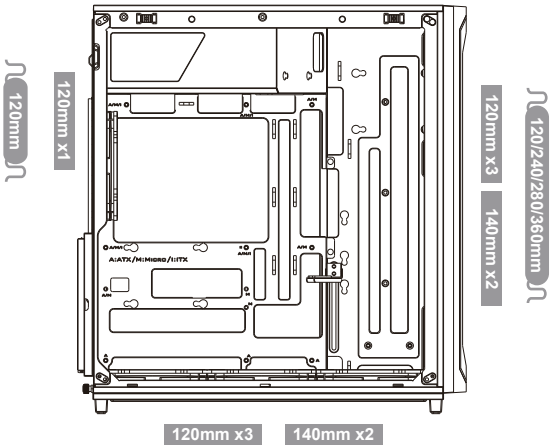

Install 3.5" HDD and 2.5" SSD

Install 3.5" HDD and 2.5" SSD

* If a 3.5-inch hard drive is installed at the bottom, only 2*120mm fans or 1*140mm fan can be installed.

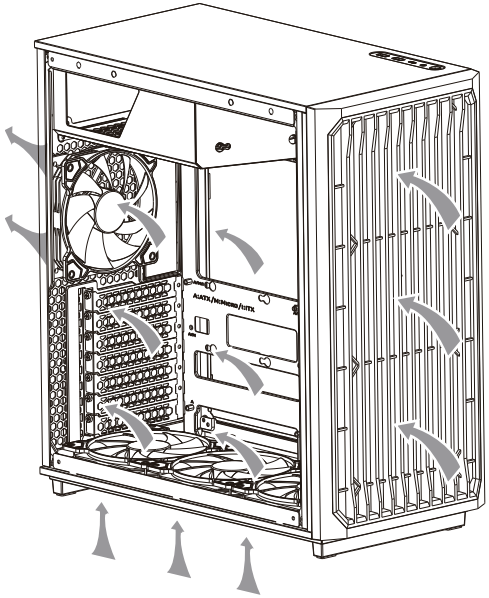

Cooling System

Fan Cooling System:

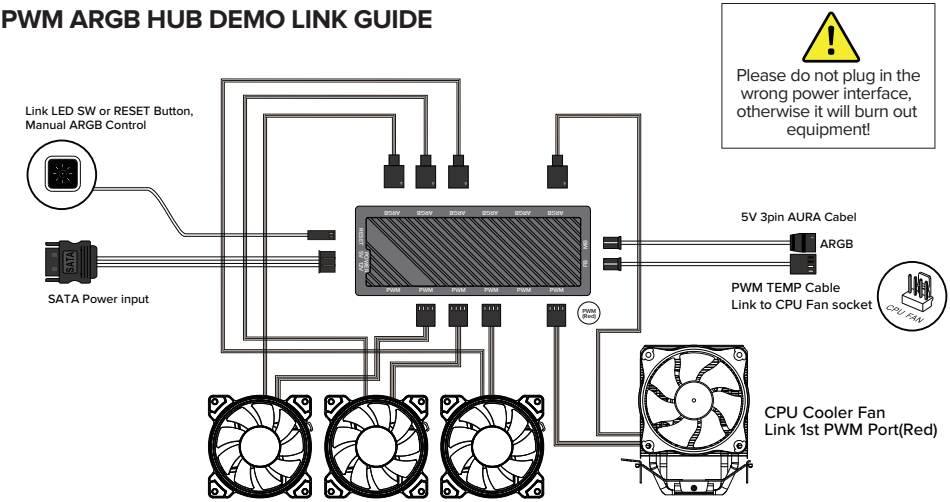

Front: 3x120mm(optional), 2x140mm(optional)
Bottom: 3x120mm / 2x140mm(optional)
Rear: 1x120mm(optional)

Airflow Direction

Pay attention to the airflow direction inside the chassis.
